

Company Profile

About the Company

GKN Hydrogen is part of Dowlais, a larger industrial investment group and was founded in 2021 with the goal to stop climate change with clean energy for a "carbon neutral" world. Since then, the company have grown into a leading Greentech company, providing hydrogen and energy storages including digital services to customers around the world.

Solutions and Services

GKN Hydrogen stores green hydrogen from renewable sources for various application. The company's state-of-the-art metal hydride storage solutions has been developed and refined over the last 8+ years to become the most reliable and secure hydrogen storage solution on the market. The robust systems generates green hydrogen from fluctuating renewable energy sources, storing it compactly and safely in metal hydride over long periods of time:

- inherently safe, solid-state-storage of hydrogen
- no compression required for storage
- smaller footprint than batteries or compressed gas storage

Clients

GKN Hydrogen work with clients across the energy supply sectors including Buildings, Infrastructure and Industrial. The company's clients include End Users and Utilities, Energy EPCs and System Integrators as well as infrastructure and energy developers, and builds strong relationships with each of them.

Team

We have assembled a team of talented and experienced professionals who are committed to actively manage the climate change. Our team of commercial experts, experienced engineers, designers, and technicians are dedicated to delivering high-quality solutions and exceptional customer service.
